

Find it EZ introduces free source code analysis in the cloud. Support for SQL Server, SQL Azure, SSRS and more!

KELOWNA, British Columbia, Canada, June 16, 2012 – Find it EZ Software Corp. has released Find it EZ Code Search cloud edition, a source code analysis search engine endorsed by Microsoft and powered by Azure that automates software change impact analysis in the cloud. Find it EZ Code Search is the world's first cloud-based source code analysis tool. A Microsoft award winning search engine, Find it EZ is certified Microsoft Platform Ready for SQL Server 2012, SQL Azure and SQL Reporting Services. Find it EZ improves software worker productivity, enabling organizations that maintain or depend on custom software to:

- 🔍 Prepare more timely and accurate estimates
- 🔍 Enhance software change management processes
- 🔍 Improve code quality

Find it EZ eliminates cost overruns that are caused by underestimating or missing affected areas of an application that need to be modified whenever new specifications are proposed.

The cloud edition includes support for scanning SQL Server and SQL Azure databases as well as SQL Reporting Services, all top 10 tiobe index programming languages, and application data files.

About Find it EZ Software Corp.

Founded in 2010, Find it EZ creates productivity tools for software developers. Whenever changes are planned or made to the underlying database in any software application, it can be a challenge to find all referenced code that can be affected. Normally, each software layer or programming language would require time-consuming and disconnected analysis with a variety of independent tools. Find it EZ provides a full 360 degree view of the entire code-stack in a single integrated application. Case studies have shown that companies like Westinghouse, Sprint, The Mayo Clinic and Pan American Life Insurance, using solutions from Find it EZ to manage their software changes, have increased their productivity by 42% or more. Find it EZ Code Search received a Microsoft award for innovation in 2011.
